ABOUT US

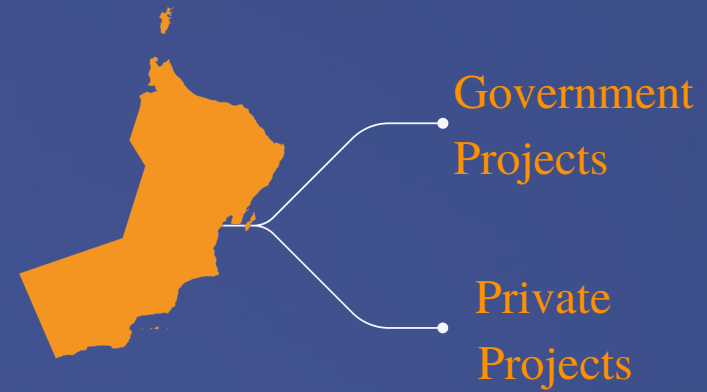

(LD) registered as an Omani owned SME company and is recognized locally and regionally as one of the finest Architectural, Structural and Engineering consultancy firms, contributing to client's success.

- We are pioneers in implementing Building Information Modelling (BIM) in the design process. We strive to optimize the considerable potential of these developing technologies as enablers of collaborative, efficient and effective building and infrastructure design. Applying innovative, and sustainable solutions, while empowering our employees, along with the thoughtful contribution of our clients to achieve the most effective designs, have proven to be a successful method to achieve AEC's objectives.
